

2009/2010 Pre-K Program Descriptions

MOSH Preschool programs help children ages four and five discover the fun of learning. Preschool programs have a class size limit of 25 students and 6 adults maximum. Siblings and additional chaperones may not be admitted into the classroom, due to size constraints, but instead will be asked to tour the museum during the program. One adult will be admitted free for every five paid children. Pre-K programs are approximately 30 minutes in length.

Friendly Stars

In this planetarium program, Mr. Sun takes us on a tour of the night sky. Along the way, students will find out that the planetarium is a very fun and special place to visit. We will also take a look at some of the constellations and planets visible in the current night sky.

SSS: Earth & Space Science

Dinos

Have fun with dinosaurs of all shapes and sizes. Learn about what dinosaurs ate and the different types of habitats in which they lived so long ago.

SSS: Life Science

Native American Folktales

Why did the grandmother spider steal the Sun? What happened when Coyote was the Moon? Children will enjoy these stories and activities from the world of the first Americans.

SSS: American History, Geography

Ready for Reptiles

Children will have the chance to learn about reptiles in our area. Some have strange habits, unusual colors and special “jobs”. Our creatures include turtles, snakes, lizards, and see – you – later alligators.

SSS: Life Science

Wings, Stings, and Crawly Things

What child doesn't like bugs? Children will learn about the life cycle of butterflies, the world of busy bees, the secrets of spiders, and other fascinating creatures.

SSS: Life Science

African Folktales

Why do mosquitoes buzz in people's ears? What tricks will Anansi, the spider, play on his friends? In this program, children will be exposed to different cultures through stories and folktales from Africa.

SSS: History, Geography

Under the Sea

Dive into the wet and wild world of ocean life! In this program we will study different types of marine life that inhabit the oceans of the world, from tiny little starfish to great big whales!

SSS: Life Science

Florida Wildlife

Explore the many animals that call Florida home. Children will learn about various habitats and different types of animals, as well as the basic needs of all living things.
